## DETAILED ACTION

### *Election/Restrictions*

This application contains claims directed to the following patentably distinct species of the claimed invention:

I. Claims 1-36 and 103-126 are drawn to a very high repetition rate gas discharge laser system in a MOPA configuration comprising: **a master oscillator gas discharge laser system and at least two power amplification gas discharge laser systems**, classified in Class 372, subclass 30.

II. Claims 37-54 and 127-129 are drawn to a very high repetition rate gas discharge laser system in a MOPA configuration comprising: **a first line narrowed gas discharge laser system, a second line narrowed gas discharge laser system, and a beam combiner**, classified in Class 372, subclass 25.

III. Claims 55-102 and 130-138 are drawn to a very high repetition rate gas discharge laser system comprising: **a compression head, a gas discharge chamber, and at least two magnetically saturable switches**, classified in Class 372, subclass 38.02.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Art Unit: 2828

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

### Communication Information

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dung (Michael) T Nguyen whose telephone number is (571) 272-1949. The examiner can normally be reached on 8:30 - 17:00.
